

Install smbclient on Ubuntu for NextCloud smb external storage

NextCloud has external storage support, but you can add smb/cifs support in addition to the existing available providers listed in the external storage app of Nextcloud

Log into Nextcloud as an administrator. Go to Apps, and make sure External Storage is enabled.

Go to Administrative Settings and select External Storage. In the drop down window of providers, you will notice S3, etc., but not SMB/CIFS.

ssh into your Ubuntu Nextcloud server, and run the following command:

```
sudo apt install smbclient
```
